FACTORY INTRODUCTION:

Foshan HUIYI New Material Technology Co., Ltd. was founded in 2018 with its factory located in Foshan, Guangdong. We aim to establish a brand that features "Beauty" in the space decoration industry. Our BPC boards and Shapes Panels are known for their diverse decorative designs and superior decoration results.

Our factory is spread over an area of 20,000m², with an annual production capacity of 3,000,000m², and more than 120 employees. We have modern and advanced equipment, including 16 extrusion lines, 13 wrapping machines, and 3 flat laminating machines, which have a daily output of 30,000m². Our professional R&D team includes 5 senior technical engineers with more than 10 years of industry experience and was awarded by the Research Institute of Material Engineering Sciences (RIMEC).

Many of our products have been awarded the environmental-friendly aldehyde-free certificate, flame retardant certificate, and other prestigious certificates to meet regulatory requirements. Our factory is a 3A-level quality credit enterprise unit. We have been awarded "The Most Favored Wall Decorative Material Brand By Designers", and have obtained the certificates of ISO9001, SGS, and CE.

We have more than 30,000m² base panel inventory and 500,000m² decorative film inventory. Our lead time for regular-size products is 10 days and customized-size products is 20 days.

Our brand "FORONE" provides a wide range of beautiful colors and products to enable designers to create aesthetics. To provide a superior living space experience, we have been collaborating with top-tier interior designers all over the world across different projects and product designs.

Better products, Better quality, Better service.

Decorative panel FORONE is the best choice of designers.

Designer

We have converted our plant into a laboratory to conduct research materials and processes together with our partners of designers and engineers. Our engineering and manufacturing experience transforms the materials looking to the future and maintaining a balance between sustainability, creativity, functionality, and beauty of the panels and boards made.

Ongoing investment into the latest technology improves our capacity to manufacture with greater growth, higher productivity, and an enhanced international positioning.

Using cutting-edge technology creates competitive advantages by optimizing advanced processes, greater performance formulas, and attractive surface finishes.

We are convinced that space and its aesthetic environment have a decisive influence on emotions, feelings, and mental health.

We aim to provide quality to people in their space, creating aesthetic environments to provide a joyful interior experience.

Designer
Antti Kotilainen,
Design Office Antti Kotilainen
was founded 1997 in Helsinki.
